About the Webinar:

Human history is a history of people using their imagination, innovation and creativity to solve problems or express ideas based on existing knowledge. In today's globally competitive environment Intellectual Property Right has places itself on a pedestal in the context of economic growth and is becoming increasingly important. IPR very broadly, means the legal rights which result from intellectual activity in the industrial, scientific, literary and artistic fields. As per the World Intellectual Property Organization (WIPO), Article 2(viii) provides that "intellectual property shall include rights relating to: - literary, artistic and scientific works, - performances of performing artists, phonograms and broadcasts, - inventions in all fields of human endeavour, - scientific discoveries, - industrial designs, - trademarks, service marks and commercial names and designations, - protection against unfair competition. Since intellectual property gives innovators market power and competition policy aims at, among other goals, preventing or eliminating the abuse of market power. Therefore the webinar aims to put a light on IPR issues and challenges in trade and trade related practices in the national trade and trade in abroad.
