Platform : Windows.

Role : Design, Development, and Implementation.

Description : The main objective of this project is to build an application known as "Security System Using IP Camera" which provides security to the server rooms; the main purpose of this project is to minimize the overhead of monitoring continuously and minimize the wastage of bandwidth of the network and network resources

M.Tech(Computer Science)

Title : FUZZY TYPE-AHEAD SEARCH in XML

Tools : NETBEANS IDE

Platform : Windows.

Role : Design, Development, and Implementation.

Description : A fuzzy type-ahead search method in XML data. TASX searches the XML data on the fly as user's type in query keywords, even in the presence of minor errors of their keywords. TASX provides a friendly interface for users to explore XML data, and can significantly save users typing effort. In this paper, we study research challenges that arise naturally in this computing paradigm. The main challenge is search efficiency. Each query with multiple keywords needs to be answered efficiently.
